Honeycomb Prototype V1: Task Scenarios

Team A17, CS 3803-DCA, Fall 2026

Honeycomb is a free web app for Georgia Tech undergraduates. It imports Canvas deadlines and Google Calendar, takes quick entries for everything else, and ranks it all into one “Do this next” card. This prototype uses sample data, so do not enter real links or passwords. Log in with the details already filled in.

Prototype link: https://jays-hub.github.io/honeycomb-v1/

The link opens a Prototype menu. Start each scenario from there.

Scenario 1: Tonight’s deadlines

It is 7:00 PM on Sunday, Nov 8. You have several deadlines tonight and may not finish them all, so you want to protect your grades. You just remembered a HIST 2111 Reading Quiz that is not in the app yet. It is due tonight at 9:00 PM, should take about 45 minutes, and is worth 3% of your course grade.

Get the quiz into Honeycomb, then work out what to start first and why. You also want to know how long the task after it should take, and which task would cost you the least if you run out of time. Now suppose you finish that first task. You aren’t up for the next one, so put it off and see what Honeycomb suggests instead.

Scenario 2: First-time setup and a wrong date

It is Sunday, Nov 8. You are a first-year student opening Honeycomb for the first time. Your classes are in Google Calendar, your deadlines are in Canvas, and you do not want to type assignments in by hand.

Get your classes and deadlines into Honeycomb using the sample data provided. Your instructor just moved MATH 1554 Homework 9 to Friday, Nov 13 at 11:59 PM, but Canvas still shows Wednesday, Nov 11. Fix this in Honeycomb and see how it affects your priorities.

Scenario 3: Balancing the week

It is 7:00 PM on Sunday, Nov 8. You are in the robotics club and work shifts at the campus recreation center. You want to see where your whole week stands, including everything outside of class.

Find out when your next work shift is, what Honeycomb thinks you should do next, and why. See how far along your Clubs tasks are. You also need to book a room for the robotics meeting but have no details yet, so record it under Clubs as “Book room for robotics meeting.” You just ordered the motor parts, so update Honeycomb and see where Clubs stands now.
